

When we say “Smarter”.

SCHOOL OF EDUCATION

The School of Education is an innovative, diverse educator preparation program in the Dallas-Fort Worth area. You'll develop close relationships with professors and get the extensive experience you need to become a successful and marketable educator, coach, researcher, administrator or athletic trainer.

GET A GREAT JOB

Our co-teaching model provides more experience and this preparation means you're more likely to ace your certification tests.

- Our co-teaching model allows you to work jointly to get more experience than traditional student-teaching. That means when the first day of class comes, you'll be ready.
- Based on data from CREATE, an organization that tracks data on all teacher preparation institutions in Texas, the Texas Wesleyan University Teacher Preparation Program consistently produces graduates whose longevity in the classroom as teachers is greater than both the average of all Texas public universities and all Texas private universities.
- Kinesiology students in the athletic training program are regularly accepted to present research and case studies at regional and national professional meetings.

MENTORSHIP COMES FIRST

We provide one-on-one advising twice a semester, connect you with professional experience opportunities and share our knowledge of the educational, counseling and kinesiology worlds to help you thrive.

- You'll be advised by a professor twice a semester, which gives you more purposeful time with faculty. That helps you to stay on track and to get the type of one-on-one attention we promise.
- The First Day of College: Reading Camp is a collaboration with Texas Wesleyan University's School of Education and Fort Worth ISD elementary schools that educate second language learners from all over the world.

A LARGE NETWORK

Our award-winning alumni network in Dallas, Fort Worth and Arlington can connect you to new opportunities in the workforce.

- We have teachers and administrators in schools all across the Fort Worth, Arlington, Mansfield and Dallas school districts.
- Most exercise science students who complete an internship are offered full-time employment at those internship sites where they studied.
- M.Ed. students have the opportunity to study abroad every summer in exotic places, while receiving graduate credit. Previous destinations include Peru, Guatemala, Ecuador and Brazil.
